Subject Index of Volume 35

Ab initio structure determination
techniques for *ab initio* structure determination from X-ray powder diffraction data, 267
Adsorption
ion exchange and adsorption in layered phosphates, 257
Aging
aging and sub-T_g relaxation in arsenic selenide glass fibers, 160
Alcohol synthesis
preparation and characterization of hydroxycarbonate precursors that yield successful alcohol synthesis catalysts, 233
Alloying elements
formation of austenite from a mixture of bainitic ferrite and austenite, 168
Alloys
pulse electrodeposition of Y–Ba–Cu alloyed films from an aqueous bath, 86
AlN materials
degradation of dense AlN materials in aqueous environments, 43
$AlPO_4$-8
crystal structure of 14-ring aluminophosphate $AlPO_4$-8 from powder data, 301
Alumina
the deposition behavior of electroless nickel on alumina substrate, 53
Aluminophosphates
crystal structure of 14-ring aluminophosphate $AlPO_4$-8 from powder data, 301
Aluminum
electromigration in two-level bamboo grain structure Al(Cu)/W interconnections, 95
crystallization and decomposition of co-sputtered amorphous silicon–aluminum thin films, 99
reactivity of alpha-titanium phosphate/n-alkylamine intercalation compounds with mono- and polymeric aluminum species, 250
Amorphous alloys
crystallization and decomposition of co-sputtered amorphous silicon–aluminum thin films, 99
Aqueous environments
degradation of dense AlN materials in aqueous environments, 43
Arsenic
a study of high-strength arsenic triselenide glass fibers, 21
Arsenic selenide
aging and sub-T_g relaxation in arsenic selenide glass fibers, 160
Aurichalcite
preparation and characterization of hydroxycarbonate precursors that yield successful alcohol synthesis catalysts, 233
Austenite
formation of austenite from a mixture of bainitic ferrite and austenite, 168
Austenitic stainless steel
hydrogen-enhanced plasticity of 310S stainless steel, 58
Bainitic ferrite
formation of austenite from a mixture of bainitic ferrite and austenite, 168
Bamboo grain structure
electromigration in two-level bamboo grain structure Al(Cu)/W interconnections, 95
Barium
electrokinetic and magnetic properties of submicron $BaFe_{12}O_{19}$ ferrite powder dispersions, 31
pulse electrodeposition of Y–Ba–Cu alloyed films from an aqueous bath, 86
arrangements of oxygen atoms in $YBa_2Cu_3O_{6+x}$ superconductors visualized by ultra-high-resolution electron microscopy, 139
Barium synthesis
synthesis and crystal structure of $Ba[V_2(HPO_4)_4](H_2O)$, 205
Cadmium
study of CdTe electrodeposition from a nonaqueous bath, 15
Calcium lanthanum sulfide
dispersion of precursors for improving the homogeneity and sinterability of $CaLa_2S_4$ powders, 64
Calculation methods
determination of the thermodynamic equilibrium constants of ion-exchange processes, 247
Cathodoluminescence
spatial distribution of Mn-related emission in GaP studied by cathodoluminescence and photoluminescence, 126
Chain compounds
metal–metal interactions in chain compounds of gold(I): syntheses and crystal structures of chlorotetrahydrothiophenegold(I), bromotetrahydrothiophenegold(I) and iodotetrahydroselenophenegold(I), 281
Chemical durability
optical properties and chemical durability of lead–indium–aluminum phosphate glass, 49
Chemical etch
a new chemical etch for defects studies in very thin film (< 1000 Å) SIMOX material, 129
Chiral crystals
the phenomenon of conglomerate crystallization. Part XXXI. The crystallization behavior of [*cis*-Co(en)$_2$-$(NO_2)_2$Br and of [*cis*-α-Co(triethylenetetramine)$(NO_2)_2$]-$(NO_3)\cdot\frac{1}{2}H_2O$: counter-ion effects on crystallization pathway of racemate solutions, 290
Citrate gel method
synthesis of $Pb_2Sr_3Pr_5Cu_5O_z$ and $Pb_2Sr_3PrCuO_d$ by the citrate gel method, 92
Cobalt
the phenomenon of conglomerate crystallization. Part XXXI. The crystallization behavior of [*cis*-Co(en)$_2$-$(NO_2)_2$Br and of [*cis*-α-Co(triethylenetetramine)$(NO_2)_2$]-$(NO_3)\cdot\frac{1}{2}H_2O$: counter-ion effects on crystallization pathway of racemate solutions, 290
Compartmentalized electron donor/acceptor pair
preparation of layered zirconium phosphonate/phosphate, zirconium phosphonate/phosphite and related compounds, 208

Conglomerate crystallization
the phenomenon of conglomerate crystallization. Part XXXI. The crystallization behavior of [*cis*-Co(en)$_2$-(NO$_2$)$_2$Br and of [*cis*-α-Co(triethylenetetramine)(NO$_2$)$_2$]-(NO$_3$)·½H$_2$O: counter-ion effects on crystallization pathway of racemate solutions, 290
Contact pressure
on the influence of applied contact pressure on the kinetic behavior of the α-AgI/I$_2$(g),graphite electrode, 155
Coordination chemistry
new solids and surfaces, via coordination chemistry, 225
Coordination compounds
the phenomenon of conglomerate crystallization. Part XXXI. The crystallization behavior of [*cis*-Co(en)$_2$-(NO$_2$)$_2$Br and of [*cis*-α-Co(triethylenetetramine)(NO$_2$)$_2$]-(NO$_3$)·½H$_2$O: counter-ion effects on crystallization pathway of racemate solutions, 290
Copper
pulse electrodeposition of Y–Ba–Cu alloyed films from an aqueous bath, 86
synthesis of $Pb_2Sr_3Pr_5Cu_5O_x$ and $Pb_2Sr_3PrCuO_d$ by the citrate gel method, 92
electromigration in two-level bamboo grain structure Al(Cu)/W interconnections, 95
arrangements of oxygen atoms in $YBa_2Cu_3O_{6+x}$ superconductors visualized by ultra-high-resolution electron microscopy, 139
preparation and characterization of hydroxycarbonate precursors that yield successful alcohol synthesis catalysts, 233
Copper–oxygen sheets
mechanisms for hole doping in thallium cuprate superconductors having single copper–oxygen sheets, 240
Corrosion
degradation of dense AlN materials in aqueous environments, 43
Crystallization
hydrothermal crystallization and structural investigation of $Na_{1+2x}Zr_{2-x}Mg_x(PO_4)_3$ systems ($0<x<1$), 28
crystallization and decomposition of co-sputtered amorphous silicon–aluminum thin films, 99
Crystal structures
synthesis and crystal structure of $Ba[V_2(HPO_4)_4](H_2O)$, 205
techniques for *ab initio* structure determination from X-ray powder diffraction data, 267
the use of crystal structures to elucidate solution coordination chemistry, 273
metal–metal interactions in chain compounds of gold(I): syntheses and crystal structures of chlorotetrahydrothiophenegold(I), bromotetrahydrothiophenegold(I) and iodotetrahydroselenophenegold(I), 281
Cu/ZnO catalysts
preparation and characterization of hydroxycarbonate precursors that yield successful alcohol synthesis catalysts, 233
Cyclic voltammetry
characterisation and evaluation of iridium cobaltite oxygen-evolving electrodes: influence of composition and temperature of preparation, 176

Defects studies
a new chemical etch for defects studies in very thin film (<1000 Å) SIMOX material, 129
Deformation
hydrogen-enhanced plasticity of 310S stainless steel, 58
the response of metal-matrix composites subjected to quasi-static and shock-wave deformation, 71
Degradation
degradation of dense AlN materials in aqueous environments, 43
Deposition
the deposition behavior of electroless nickel on alumina substrate, 53
Design
electronic factors in the design and reactivity of low-dimensional solids, 219
Dichloroanthraquinone
physico-chemical characterization of 1,8-dichloroanthraquinone evaporated thin films, 36
Dinuclear complexes
the use of crystal structures to elucidate solution coordination chemistry, 273
Discrete metal complexes
the use of crystal structures to elucidate solution coordination chemistry, 273

Electrocatalysis
X-ray photoelectron spectroscopy investigation of electrocatalytic surface electrodes for the hydrogen evolution reaction (HER), 145
Electrocatalytic anode
characterisation and evaluation of iridium cobaltite oxygen-evolving electrodes: influence of composition and temperature of preparation, 176
Electrodeposition
study of CdTe electrodeposition from a nonaqueous bath, 15
pulse electrodeposition of Y–Ba–Cu alloyed films from an aqueous bath, 86
Electrodes
on the influence of applied contact pressure on the kinetic behavior of the α-AgI/I$_2$(g),graphite electrode, 155
Electrokinetic properties
electrokinetic and magnetic properties of submicron $BaFe_{12}O_{19}$ ferrite powder dispersions, 31
Electroless nickel
the deposition behavior of electroless nickel on alumina substrate, 53
Electromigration
electromigration in two-level bamboo grain structure Al(Cu)/W interconnections, 95
Electronic factors
electronic factors in the design and reactivity of low-dimensional solids, 219
Electron microscopy
arrangements of oxygen atoms in $YBa_2Cu_3O_{6+x}$ superconductors visualized by ultra-high-resolution electron microscopy, 139
Enthalpy of formation
the explicit expression for the enthalpy of formation of organometallic compounds of Si, Ge and Sn, 151
Equilibrium constants
determination of the thermodynamic equilibrium constants of ion-exchange processes, 247
Etching
magnetically enhanced reactive ion etching of photoresist in O$_2$/Ar mixtures during a tri-level resist process, 134

Ferrite
electrokinetic and magnetic properties of submicron $BaFe_{12}O_{19}$ ferrite powder dispersions, 31

Ferroelectrics
gel growth and characterisation of ferroelectric potassium nitrate, 181
Fiber strength
a study of high-strength arsenic triselenide glass fibers, 21
Fracture modes
the response of metal-matrix composites subjected to quasi-static and shock-wave deformation, 71
Freeze-drying
dispersion of precursors for improving the homogeneity and sinterability of $CaLa_2S_4$ powders, 64

GaP
spatial distribution of Mn-related emission in GaP studied by cathodoluminescence and photoluminescence, 126
Gel growth
gel growth and characterisation of ferroelectric potassium nitrate, 181
Germanium
the explicit expression for the enthalpy of formation of organometallic compounds of Si, Ge and Sn, 151
Glass fibers
a study of high-strength arsenic triselenide glass fibers, 21
aging and sub-T_g relaxation in arsenic selenide glass fibers, 160
Gold
metal–metal interactions in chain compounds of gold(I): syntheses and crystal structures of chlorotetrahydrothiophenegold(I), bromotetrahydrothiophenegold(I) and iodotetrahydroselenophenegold(I), 281
Graphite
on the influence of applied contact pressure on the kinetic behavior of the α-AgI/I_2(g),graphite electrode, 155
Growth mechanism of austenite
formation of austenite from a mixture of bainitic ferrite and austenite, 168

Hole doping
mechanisms for hole doping in thallium cuprate superconductors having single copper–oxygen sheets, 240
Hot isostatic pressing
dispersion of precursors for improving the homogeneity and sinterability of $CaLa_2S_4$ powders, 64
Hydrogen
hydrogen-enhanced plasticity of 310S stainless steel, 58
Hydrogen bonds
the phenomenon of conglomerate crystallization. Part XXXI. The crystallization behavior of [*cis*-Co(en)$_2$-$(NO_2)_2$Br and of [*cis*-α-Co(triethylenetetramine)$(NO_2)_2$]-$(NO_3)\cdot\frac{1}{2}H_2O$: counter-ion effects on crystallization pathway of racemate solutions, 290
Hydrogen evolution reaction
X-ray photoelectron spectroscopy investigation of electrocatalytic surface electrodes for the hydrogen evolution reaction (HER), 145
Hydrotalcite
preparation and characterization of hydroxycarbonate precursors that yield successful alcohol synthesis catalysts, 233
Hydrothermal crystallization
hydrothermal crystallization and structural investigation of $Na_{1+2x}Zr_{2-x}Mg_x(PO_4)_3$ systems ($0<x<1$), 28
Hydrothermal synthesis
hydrothermal synthesis and characterization of vanadyl alkylphosphonates $VORPO_3\cdot H_2O$, 199

Inorganic ion-exchangers
preparation of layered zirconium phosphonate/phosphate, zirconium phosphonate/phosphite and related compounds, 208
Inorganic–organic layered structure
preparation of layered zirconium phosphonate/phosphate, zirconium phosphonate/phosphite and related compounds, 208
Insulation films
formation of stacked insulation films on rough metal surfaces, 11
Intercalation
reactivity of alpha-titanium phosphate/n-alkylamine intercalation compounds with mono- and polymeric aluminum species, 250
Intercalation of polymers
intercalation of insulating polymers into layered zirconium phosphates, 193
Iodine
on the influence of applied contact pressure on the kinetic behavior of the α-AgI/I_2(g),graphite electrode, 155
Ion exchange
determination of the thermodynamic equilibrium constants of ion-exchange processes, 247
reactivity of alpha-titanium phosphate/n-alkylamine intercalation compounds with mono- and polymeric aluminum species, 250
ion exchange and adsorption in layered phosphates, 257

Kinetics
crystallization and decomposition of co-sputtered amorphous silicon–aluminum thin films, 99

Layered alpha-titanium phosphate
reactivity of alpha-titanium phosphate/n-alkylamine intercalation compounds with mono- and polymeric aluminum species, 250
Layered phosphates
ion exchange and adsorption in layered phosphates, 257
Layered structures
hydrothermal synthesis and characterization of vanadyl alkylphosphonates $VORPO_3\cdot H_2O$, 199
Layered zirconium phosphates
intercalation of insulating polymers into layered zirconium phosphates, 193
Lead
synthesis of $Pb_2Sr_3Pr_3Cu_3O_x$ and $Pb_2Sr_3PrCuO_d$ by the citrate gel method, 92
Ligand conformations
the use of crystal structures to elucidate solution coordination chemistry, 273
Light emission
light emission properties of porous silicon, 1
Low-dimensional solids
electronic factors in the design and reactivity of low-dimensional solids, 219
Luminescence
light emission properties of porous silicon, 1
luminescence of rare-earth activated Y_2SiO_5, 114

Macrocyclic complexes
the use of crystal structures to elucidate solution coordination chemistry, 273
Magnesium
hydrothermal crystallization and structural investigation of $Na_{1+2x}Zr_{2-x}Mg_x(PO_4)_3$ systems ($0<x<1$), 28

Magnetic properties
electrokinetic and magnetic properties of submicro $BaFe_{12}O_{19}$ ferrite powder dispersions, 31
Manganese
spatial distribution of Mn-related emission in GaP studied by cathodoluminescence and photoluminescence, 126
Metal matrix composites
the response of metal-matrix composites subjected to quasi-static and shock-wave deformation, 71
Metal–metal interactions
metal–metal interactions in chain compounds of gold(I): syntheses and crystal structures of chlorotetrahydrothiophenegold(I), bromotetrahydrothiophenegold(I) and iodotetrahydroselenophenegold(I), 281
Molecular sieves
crystal structure of 14-ring aluminophosphate $AlPO_4$-8 from powder data, 301

Nickel
the deposition behavior of electroless nickel on alumina substrate, 53
Nonaqueous baths
study of CdTe electrodeposition from a nonaqueous bath, 15

Optical properties
optical properties and chemical durability of lead–indium–aluminum phosphate glass, 49
Organometallic compounds
the explicit expression for the enthalpy of formation of organometallic compounds of Si, Ge and Sn, 151
Oxides
oxygen diffusion in perovskite-related oxides, 221
Oxygen
arrangements of oxygen atoms in $YBa_2Cu_3O_{6+x}$ superconductors visualized by ultra-high-resolution electron microscopy, 139
Oxygen diffusion
oxygen diffusion in perovskite-related oxides, 221
Oxygen evolution
characterisation and evaluation of iridium cobaltite oxygen-evolving electrodes: influence of composition and temperature of preparation, 176

Partition coefficients
formation of austenite from a mixture of bainitic ferrite and austenite, 168
Perovskite-related oxides
oxygen diffusion in perovskite-related oxides, 221
Phosphate glass
optical properties and chemical durability of lead–indium–aluminum phosphate glass, 49
Phosphates
preparation and characterization of zirconium phosphate diphosphonates with the γ-structure: a new class of covalently pillared compounds, 187
intercalation of insulating polymers into layered zirconium phosphates, 193
hydrothermal synthesis and characterization of vanadyl alkylphosphonates $VORPO_3 \cdot H_2O$, 199
synthesis and crystal structure of $Ba[V_2(HPO_4)_4](H_2O)$, 205
Phosphonates
preparation and characterization of zirconium phosphate diphosphonates with the γ-structure: a new class of covalently pillared compounds, 187
preparation of layered zirconium phosphonate/phosphate, zirconium phosphonate/phosphite and related compounds, 208
Photoluminescence
spatial distribution of Mn-related emission in GaP studied by cathodoluminescence and photoluminescence, 126
Photoresist
magnetically enhanced reactive ion etching of photoresist in O_2/Ar mixtures during a tri-level resist process, 134
Physico-chemical characterization
physico-chemical characterization of 1,8-dichloroanthraquinone evaporated thin films, 36
Pillared compounds
preparation and characterization of zirconium phosphate diphosphonates with the γ-structure: a new class of covalently pillared compounds, 187
Pillaring
reactivity of alpha-titanium phosphate/n-alkylamine intercalation compounds with mono- and polymeric aluminum species, 250
Plasticity
hydrogen-enhanced plasticity of 310S stainless steel, 58
Polymers
intercalation of insulating polymers into layered zirconium phosphates, 193
Porous silicon
light emission properties of porous silicon, 1
Potassium nitrate
gel growth and characterisation of ferroelectric potassium nitrate, 181
Powder diffraction
crystal structure of 14-ring aluminophosphate $AlPO_4$-8 from powder data, 301
Praseodymium
synthesis of $Pb_2Sr_3Pr_5Cu_5O_x$ and $Pb_2Sr_3PrCuO_d$ by the citrate gel method, 92

Racemates
the phenomenon of conglomerate crystallization. Part XXXI. The crystallization behavior of [*cis*-Co(en)$_2$-$(NO_2)_2$Br and of [*cis*-α-Co(triethylenetetramine)$(NO_2)_2$]-$(NO_3) \cdot \frac{1}{2}H_2O$: counter-ion effects on crystallization pathway of racemate solutions, 290
Rare-earth activators.
luminescence of rare-earth activated Y_2SiO_5, 114
Reactivity
electronic factors in the design and reactivity of low-dimensional solids, 219
Reaustenitization
formation of austenite from a mixture of bainitic ferrite and austenite, 168
Relaxation
aging and sub-T_g relaxation in arsenic selenide glass fibers, 160
Resist process
magnetically enhanced reactive ion etching of photoresist in O_2/Ar mixtures during a tri-level resist process, 134
Rietveld refinement
crystal structure of 14-ring aluminophosphate $AlPO_4$-8 from powder data, 301
Rough metal surfaces
formation of stacked insulation films on rough metal surfaces, 11

Selenium
a study of high-strength arsenic triselenide glass fibers, 21

Semiconductors
mechanisms for hole doping in thallium cuprate superconductors having single copper–oxygen sheets, 240
Shock loading
the response of metal-matrix composites subjected to quasi-static and shock-wave deformation, 71
Silicon
light emission properties of porous silicon, 1
formation of stacked insulation films on rough metal surfaces, 11
crystallization and decomposition of co-sputtered amorphous silicon–aluminum thin films, 99
the explicit expression for the enthalpy of formation of organometallic compounds of Si, Ge and Sn, 151
Silver
on the influence of applied contact pressure on the kinetic behavior of the α-AgI/I_2(g),graphite electrode, 155
SIMOX material
a new chemical etch for defects studies in very thin film (<1000 Å) SIMOX material, 129
Sodium
hydrothermal crystallization and structural investigation of $Na_{1+2x}Zr_{2-x}Mg_x(PO_4)_3$ systems ($0<x<1$), 28
Soft chemistry
ion exchange and adsorption in layered phosphates, 257
Solids
new solids and surfaces, via coordination chemistry, 225
Solid–solid ion exchange
ion exchange and adsorption in layered phosphates, 257
Spray-freezing
dispersion of precursors for improving the homogeneity and sinterability of $CaLa_2S_4$ powders, 64
Staged compounds
preparation of layered zirconium phosphonate/phosphate, zirconium phosphonate/phosphite and related compounds, 208
Stainless steel
hydrogen-enhanced plasticity of 310S stainless steel, 58
Strontium
synthesis of $Pb_2Sr_3Pr_5Cu_5O_x$ and $Pb_2Sr_3PrCuO_d$ by the citrate gel method, 92
Submicron barium ferrite powder
electrokinetic and magnetic properties of submicron $BaFe_{12}O_{19}$ ferrite powder dispersions, 31
Sulfidization
dispersion of precursors for improving the homogeneity and sinterability of $CaLa_2S_4$ powders, 64
Superconductors
synthesis of $Pb_2Sr_3Pr_5Cu_5O_x$ and $Pb_2Sr_3PrCuO_d$ by the citrate gel method, 92
arrangements of oxygen atoms in $YBa_2Cu_3O_{6+x}$ superconductors visualized by ultra-high-resolution electron microscopy, 139
Surfaces
new solids and surfaces, via coordination chemistry, 225
Synthesis
thermoanalytical investigation on the solid state synthesis of pure zirconium molybdate ($ZrMo_2O_8$), 120

Tantalum
formation of stacked insulation films on rough metal surfaces, 11
Tellurium
study of CdTe electrodeposition from a nonaqueous bath, 15
Thallium cuprate semiconductors
mechanisms for hole doping in thallium cuprate superconductors having single copper–oxygen sheets, 240
Thallium–oxygen sheets
mechanisms for hole doping in thallium cuprate superconductors having single copper–oxygen sheets, 240
Thermoanalytical investigation
thermoanalytical investigation on the solid state synthesis of pure zirconium molybdate ($ZrMo_2O_8$), 120
Thermodynamics
determination of the thermodynamic equilibrium constants of ion-exchange processes, 247
Thin films
physico-chemical characterization of 1,8-dichloroanthraquinone evaporated thin films, 36
crystallization and decomposition of co-sputtered amorphous silicon–aluminum thin films, 99
Tin
the explicit expression for the enthalpy of formation of organometallic compounds of Si, Ge and Sn, 151
Titanium
reactivity of alpha-titanium phosphate/n-alkylamine intercalation compounds with mono- and polymeric aluminum species, 250
Titanium anode
characterisation and evaluation of iridium cobaltite oxygen-evolving electrodes: influence of composition and temperature of preparation, 176
Transition metal complexes
the use of crystal structures to elucidate solution coordination chemistry, 273
Tungsten
electromigration in two-level bamboo grain structure Al(Cu)/W interconnections, 95

Vanadium
hydrothermal synthesis and characterization of vanadyl alkylphosphonates $VORPO_3 \cdot H_2O$, 199
synthesis and crystal structure of $Ba[V_2(HPO_4)_4](H_2O)$, 205
Very thin films
a new chemical etch for defects studies in very thin film (<1000 Å) SIMOX material, 129

X-ray photoelectron spectroscopy
X-ray photoelectron spectroscopy investigation of electrocatalytic surface electrodes for the hydrogen evolution reaction (HER), 145
X-ray powder diffraction
techniques for *ab initio* structure determination from X-ray powder diffraction data, 267

Yttrium
pulse electrodeposition of Y–Ba–Cu alloyed films from an aqueous bath, 86
luminescence of rare-earth activated Y_2SiO_5, 114
arrangements of oxygen atoms in $YBa_2Cu_3O_{6+x}$ superconductors visualized by ultra-high-resolution electron microscopy, 139

Zinc
preparation and characterization of hydroxycarbonate precursors that yield successful alcohol synthesis catalysts, 233

Zirconium
hydrothermal crystallization and structural investigation of $Na_{1+2x}Zr_{2-x}Mg_x(PO_4)_3$ systems ($0<x<1$), 28
thermoanalytical investigation on the solid state synthesis of pure zirconium molybdate ($ZrMo_2O_8$), 120
preparation and characterization of zirconium phosphate diphosphonates with the γ-structure: a new class of covalently pillared compounds, 187
intercalation of insulating polymers into layered zirconium phosphates, 193
preparation of layered zirconium phosphonate/phosphate, zirconium phosphonate/phosphite and related compounds, 208
Zirconium phosphate
ion exchange and adsorption in layered phosphates, 257
